EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

2. The application has been amended as follows: This application is in condition for allowance except for the presence of claims 7-16 to an invention non-elected without traverse. Accordingly, **claims 7-16 have been cancelled.**

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance: the prior art of record does not disclose or fairly teach a system comprising lapping hardware for lapping an air-bearing surface of a slider; means for electrically connecting to lead pads on the slider, a first measurement unit, connected to two lead pads that are connected to a read sensor or an electro-lapping guide for the read sensor, which measures a first electrical resistance and generates a first digital signal encoding the first electrical resistance; a second measurement unit, connected to two lead pads that are connected to an electro-lapping guide aligned with a selected structure in a write head in the slider, which measures a second electrical resistance and generates a second digital signal encoding the second electrical resistance; and a controller that stops the lapping hardware when target conditions for the stripe height are met using the first digital signal as a measure of a current stripe height and target conditions for the selected structure in the write head are met using the second digital signal as a measure of a current

lapping plane's proximity to a target air-bearing surface for the write head. The closest art, to Fukuroi, US006623330B2, column 4, lines 39 through column 6 lines 43, discloses using two ELGs, each connected to a different part of the slider, but does not disclose that the parts of the slider are the read sensor and write head or that either of the ELGs are a measure of a current lapping plane's proximity to a target air-bearing surface.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
